Use responsibly and verify critical facts. AI can make mistakes. Not intended as medical advice. This project is made available to the public at no cost and is hosted by the non-profit Consumer Wellness Center and intended for public education and research purposes to help reduce vaccine injuries and deaths while empowering parents with information they need to make decisions. See full terms here.

Vaccine Forensics is trained on millions of pages of vaccine-related documents, including scientific papers, books, expert interviews, articles and more. It finds and reports what the vaccine industry wants to hide from public view.
